

## **Developmental Health Watch ~ Age 3**

Alert your child's doctor or nurse if your child displays any of the following signs of possible developmental delay for this age range.

- Frequent falling and difficulty with stairs
- Persistent drooling or unclear speech
- Cannot build a tower of 5 blocks
- Difficulty manipulating small objects
- Cannot copy a circle
- Cannot communicate in short phrases
- No involvement in "pretend" play
- Does not understand simple instructions
- Little interest in other children
- Extreme difficulty separating from mother or primary caregiver
- Poor eye contact
